

Telstar® IF Series

Ice Flake Machines

**The only ice machine specifically
designed for the laboratory**

Telstar Icemakers

The Telstar Icemakers are the only Icemakers which are specifically designed for the laboratory. Compared with regular commercial machines the IF series offer some unique design specifications.

Features and Benefits

Safety System for ice production

A robust temperature sensor will automatically switch off the ice production as soon as the ice reaches the top of the storage bunker.

Easy to clean condenser filter

Unique in the market! The condenser filter can be cleaned without the use of any service tool. This results in easy maintenance and a longer lifetime for your system.

Easy to mount stainless steel adjustable feet come also with every cabinet

MODEL No:	IF90	IF150
Ice production	90 kg / 24 hours	150 kg / 24 hours
Storage bunker capacity	30 kg	55 kg
External Dimensions W x D x H mm	500 x 660 x 690	738 x 690 x 920
External material	Stainless Steel	
Noise level according NEN-EN-ISO 11202	48 dB (A)	49 dB (A)
Adjustable feet	Feet adjustable between 110 mm and 150 mm	
Drain	Standard drain for melting water	
Electrical	220-240 V, 50 Hz	
Weight	67 kg	94 kg
Gross weight (including flake ice)	79 kg	149 kg
