Mopping Products for Critical Environments

VWR

CONTEC

Mission-critical cleaning and contamination control.

Contec offers unparalleled on-site technical support and training.

Challenge us with your unique application!

Our line was developed by listening to customers and designing products to meet the unique performance criteria required in their applications. We invite you to share your challenging applications with us. We have regional technical specialists who work with our professional sales staff who will come to your location and recommend the best product and practice for your needs. If necessary we can develop unique custom solutions to your problems.

Global Reach

Contec owns and operates manufacturing facilities in Spartanburg, South Carolina and Suzhou, China and has distribution centers in Toledo, Ohio, and Theix, France. Both manufacturing facilities are certified to ISO 9001:2008. Contec has operational, sales, and technical service teams in North America, Europe, and Asia. These facilities and dedicated team members give Contec the ability to provide product and technical support to multinational customers with global needs.

Contec Quality

Our employees are committed to meeting each customer's specifications and exceeding each customer's expectations. We achieve this through the periodic review and continuous improvement of all processes in our management system. Our ISO certification ensures customers of consistent quality products – from development to delivery.

Customer Support

Let Contec help solve your cleaning and mopping challenges. Product samples, demonstrations and trials are always offered free-of-charge. To locate a Contec Sales Representative or Technical Specialist in your region, use our Sales Rep Locator on our web site. To order Contec cleaning products, contact your VWR Sales Representative or visit **www.vwr.com**.

Contec® Mopping Systems

The most complete line of cleaning tools for cleanrooms and controlled environments

Over the past 20 years, Contec has developed the most complete line of mopping and cleaning products for critical environments. Whether disinfecting or cleaning floors, walls, ceilings or inside bio-safety cabinets and isolators, Contec has a mop or cleaning tool that meets the demanding requirements of today's high-tech industries. Many of our mops are available validated sterile for use in aseptic environments. Mop hardware and bucket systems are fully autoclavable, unless otherwise noted. We also offer a selection of mops and buckets for customers with limited storage space.

Note: Sterile part numbers are printed in green throughout this brochure

CONTEC®

Edgeless® Mopping System
Traditional and textured polyester tube mops are the cleanest floor mopping system available for critical environments!

Edgeless Mops are made from strong, durable knitted polyester, eliminating contamination from breakage and deterioration common with cotton and rayon string mops. Cleanroom laundered Edgeless Mops are made from a continuous tube of 100% polyester knitted fabric looped to form tubular mop strands that will not shed or break. Our patented Textured and Long Textured Edgeless Mops are made with unique ribbed, twisted strands that provide additional sorbency.

Edgeless Mops have a textured head band that is ideal when extra scrubbing is required for hard-to-clean areas. All mops feature polyester tail bands for a more controlled mopping motion. The Long Textured Edgeless Mops are now available with colored tail bands for area segregation to eliminate cross-contamination.

Original Edgeless Mops and Textured Edgeless Mops are available sterilized by gamma radiation and validated per the AAMI/ISO Guidelines to a 10^{-6} SAL. They can also be sterilized by ETO and steam (autoclave) sterilization methods. Validation reports available upon request

Designed for use with aqueous solutions containing cleaning agents and disinfectants, Edgeless Mops are compatible with a wide range of chemicals.
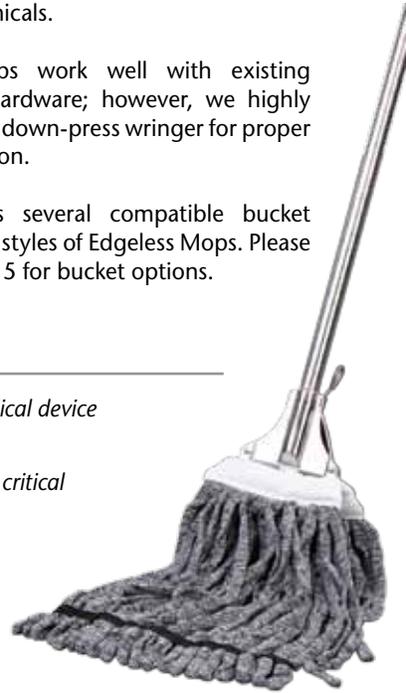

Edgeless mops work well with existing string mop hardware; however, we highly recommend a down-press wringer for proper liquid extraction.

Contec offers several compatible bucket systems for all styles of Edgeless Mops. Please see pages 12-15 for bucket options.

EL

APPLICATIONS

- *Designed for semiconductor, pharmaceutical, biotech, and medical device industries for lab clean up and process area cleaning.*
- *Ideal for general purpose cleaning in ISO Class 3 as well as less critical environments such as Animal Lab facilities.*
- *Designed for wet/damp mopping.*
- *Rugged polyester construction is ideal for tough cleaning tasks.*
- *Compatible with a wide range of chemicals and disinfectants.*

ORIGINAL

Edgeless® Mop

Traditional tube construction.
(68300-353, 68310-119)

TEXTURED

Textured Edgeless® Mop

Unique ribbed, twisted strands that are more sorbent.
(80080-578, 80080-582)

LONG

Long Textured Edgeless® Mop

Ribbed, twisted strands and additional length for extra liquid capacity. Ideal for cleaning larger areas.
(94002-784, 94002-794, 94002-790, 94002-792, 94002-788, 94002-786)

QuickConnect™ Mop Hardware

Contec offers a variety of stainless steel, anodized aluminum, and fiberglass handles for the Edgeless Mop system. See page 11 for more information.

QuickConnect™ Dynamate® Edgeless® Mop Head Frame: Interchangeable mop head frame is constructed out of Delrin® and aluminum and features a quick-connect button that allows for easy attachment to compatible handles. Fully autoclavable. Use with Contec QuickConnect interchangeable handles.

QuickConnect Mop Handles: Stainless steel and aluminum handles attach to the Dynamate Edgeless Mop Head Frame with the push of a button. We recommend the QuickConnect 60"(152cm) stainless steel one piece handle for most applications. Lightweight anodized aluminum or electro-polished stainless steel 50" (127cm) handles that extend to 92" (234cm) are also available. Fully autoclavable.

33502-718 (2646)

89073-978 (2725)

Integrated handles: 1 piece stainless steel handle; 2 piece stainless steel handle breaks down for easy autoclaving. A fiberglass handle is available for non-sterile

68310-012 (2640), 68310-014 (2641)

FEATURES	BENEFITS
All Edgeless® Mops	
100% Polyester fiber construction	Durable, chemical resistant; resistant to mold and mildew.
Continuous loop of mop strands	Provides improved cleanliness, eliminating cut edges.
Tail band	Improved control of mopping motion. Easier mopping around table and equipment legs and wheels.
Textured large head band	Provides scrubbing power for difficult stains and debris.
Chemical resistant	Compatible with wide range of chemicals and disinfectants.
Original Edgeless® Mop (68300-353, 68310-119)	
Available Validated Sterile	Assured Sterility; complete validation documentation available.
Textured Edgeless® Mop (80080-578, 80080-582)	
Mop strands with enhanced rib design	Twisted strands increase sorbent capacity of mop.
Available Validated Sterile	Assured Sterility; includes proper documentation.
Long Textured Edgeless® Mop (94002-784, 94002-794, 94002-790, 94002-792, 94002-788, 94002-786)	
100% Polyester fiber construction	Durable: eliminates cotton mop fibers that can be a food source for mold and bacteria in the facility.
Rugged knitted construction	Lasts up to 10 times longer than traditional mops. Can be laundered or processed in commercial washers.
Longer mop head	Holds more liquid for mopping larger areas.
Colored tail band	Allows designation of mops to specific areas within the same facility.
Special Gray Mop	For use in "dirty" areas; gray mop strands maintain a consistant appearance over the life of the mop.

Contec's Long Textured Edgeless Mops feature colored tail bands for area segregation to eliminate cross-contamination.

Covered by US patent No. 7389559

VertiKlean® Wall Washing System
Lightweight polyester disposable mop designed for vertical surfaces

VertiKlean mop heads are made by laminating a polyester clean room knit fabric to clean ester foam. The foam carries solvents and disinfectants to the surface and the polyester fabric offers excellent abrasion resistance and helps distribute the liquid uniformly on the surface being cleaned. The mops are laser cut to seal the edges, further limiting potential contamination in the mopping process. VertiKlean mops contain no cellulose and are compatible with gamma, ETO, and autoclave sterilization. For those applications requiring additional scrubbing performance, there is a VertiKlean mop with a textured surface.

APPLICATIONS

- *Developed for applying disinfectants and wet cleaning ceilings and walls in controlled environments.*

- *Provides a complete range of motion. Ideal for reaching awkward corners and ceilings.*

FEATURES & BENEFITS

- Intended for one-time use, economical mop heads are available in 3 sizes for a variety of cleaning tasks.

- For aseptic processing or sterile core areas, our sterile VertiKlean mop heads provide truly validated sterility to a Sterility Assurance Level of 10^{-6} in accordance with standards and recommended practices of the AAMI Guidelines. Validation reports can be available upon special request.

- Compatible with a wide range of chemicals, detergents, disinfectants and cleaners.

- VertiKlean Sox mop head covers are available for all sizes of VertiKlean mop heads. Presaturated and Sterile covers can be available upon special request.

VERTIKLEAN® SOCK

VertiKlean Sox mop head covers
The VertiKlean Sox is a removable cover designed to increase the durability of the VertiKlean Mop when used on rough surfaces. Mop head covers are made from knitted fabric for added durability and added liquid retention. Presaturated covers are available; please call for details.
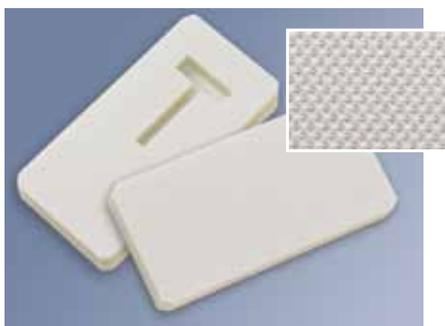

Textured VertiKlean mop heads
Offered in three sizes, Textured VertiKlean mop heads have a rugged textured polyester face for those applications that require extra scrubbing.
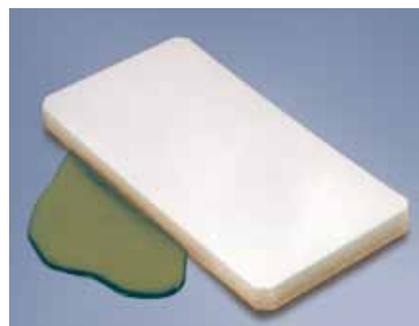

VertiKlean Sponge
Absorbent, abrasion-resistant cleanroom sponge is made of the same material as our VertiKlean mops. Autoclavable. (VKSPONGE-1, VKST0003)

TEXTURED VERTIKLEAN® MOP

VERTIKLEAN® SPONGE

QuickConnect™ Hardware

• Lightweight swivel frame slips inside the mop head to provide easy maneuverability and full range of motion. Ideal for reaching ceilings and awkward corners, as well as under and over machinery, equipment, and tables.

• QuickConnect mop head frames easily snap into a wide variety of handles with the push of a button. Available in 3 sizes to fit coordinating VertiKlean and VertiKlean MAX mop heads.

• QuickConnect handles are available in stainless steel, anodized aluminum, and fiberglass. Fully autoclavable.

• Contec offers several stainless steel and durable polypropylene bucket options to complement the VertiKlean system. All buckets are autoclavable. See pages 12-15.

VertiKlean® MAX™
Disposable polyester and foam mop

The VertiKlean® MAX™ Mopping System is designed for cleaning and application of disinfectants to walls, ceilings and other hard to reach surfaces. The disposable absorbent mop head features hydrophilic polyurethane foam laminated to polyester fabric backed by a semi-rigid thermoformed plate that easily snaps onto a VertiKlean mop head frame. While it's performance is similar to that of our industry-standard VertiKlean mops, VertiKlean MAX offers increased sorbency and has a slimmer profile for cleaning in tighter spaces.

Compatible with Contec's QuickConnect mop handles, the pivoting mop head frame makes it easy to clean around door and window frames as well as light fixtures and heavy equipment. Extension handles allow for cleaning up to 15' (4.5m).

FEATURES & BENEFITS

• Light weight mop reduces stress on maintenance staff.

• Retains liquid better than competitive products.

• Enables uniform application of disinfectants.

• Lasts longer than traditional sponge mops.

• Available in three sizes for a wide range of cleaning applications.

• Available Gamma irradiated. Validated sterile to a Sterility Assurance Level of 10^{-6} one of the strictest guidelines established by the AAMI. *NOTE: Autoclaving of VertiKlean MAX is not recommended, due to the thermoformed plastic backplate.*

• To increase the durability of the VertiKlean MAX Mop, VeritiKlean Sox mop head covers are available for all sizes.

• For added flexibility, various dry and presaturated disposable cleanroom wipes are available to fit the unique design of the VertiKlean MAX Mop. See our web site for compatible cleanroom wipe options.

APPLICATIONS

• *Designed for applying disinfectants and cleaning both horizontal and vertical surfaces.*

• *Ideal for general cleaning of ceilings, walls, and floors.*

• *Cleaning around door and window frames, light fixtures, and heavy equipment.*

• *Small size is appropriate for confined spaces such as fume hoods, isolators, bio-safety cabinets and mini environments.*

• *Large VertiKlean MAX is ideal for covering broader surfaces.*

EasyReach™ Cleaning Tool
## For isolators, cabinets and laminar air flow hoods

Made from lightweight stainless steel and 16.5" (42cm) long, the EasyReach cleaning tool is easily passed through transfer hatches, requires no assembly and is maintenance-free. EasyReach is fully autoclavable and simple to use with one hand. The low profile, 360 degree pivoting head ensures even the most awkward areas can be quickly reached with minimum effort. Use with a variety of disposable absorbent EasyReach Cleaning Pads, created with easy installation and removal in mind. For convenience, EasyReach Cleaning Pads are available presaturated.

A QuickConnect EasyReach mop head is also available, and is compatible with longer QuickConnect extension handles.
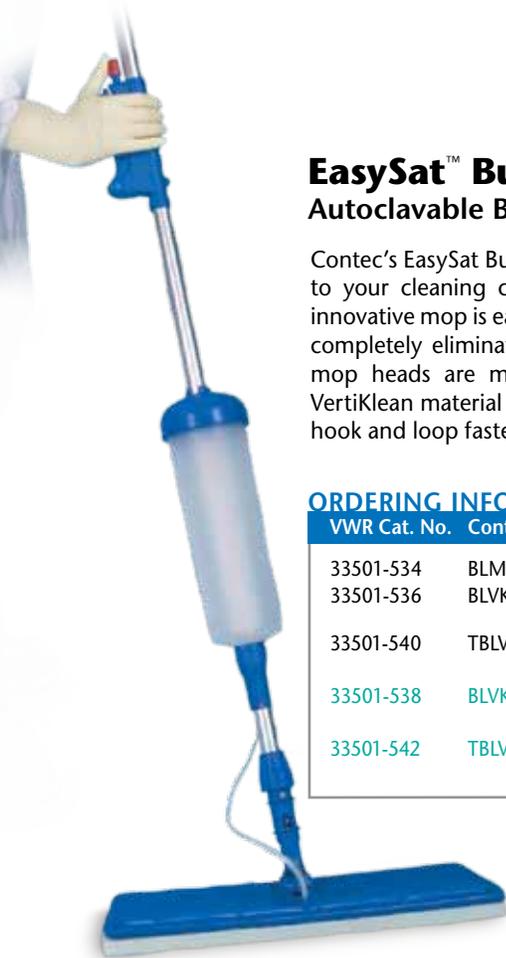

APPLICATIONS

EasyReach is recommended for effective cleaning and disinfection of surfaces in:

- *Isolators - rigid, flexible film, half suits*
- *Restricted Access Barrier Systems (RABS)*
- *Filling Lines*
- *Laminar Air Flow Hoods*
- *Bio-Safety Cabinets*
- *Glove Boxes*
- *Incubators*
- *Mini Environments*

EASYREACH CLEANING PADS

- Extra thick quilted polyester pads are very absorbent and hold cleaning solutions well, enabling easy cleaning.
- Well-fitted EasyReach pad ensures effective, even surface coverage reducing the number of viable and non-viable contaminants and ensuring maximum residue removal.
- Specially designed tab enables quick and easy fitting to the frame with gloved hands.
- Double bagged to ensure no bioburden is added to the critical environment. Available validated sterile.
- Available presaturated with 70% IPA or ETOH and 30% DI Water.

EasySat™ Bucketless Floor Mop
Autoclavable Bucketless Floor Mop

Contec's EasySat Bucketless Floor Mop is an effective and quick solution to your cleaning challenges. Designed for the cleanroom floor, this innovative mop is easy to use — the built-in 52 ounce (1.5L) solution tank completely eliminates the need for a bucket and wringer. Disposable mop heads are made from our knitted polyester/clean ester foam VertiKlean material and attach to hardware in seconds using traditional hook and loop fasteners. EasySat is for floor use only.

FEATURES & BENEFITS

- Solution tank holds up to 52 ounces (1.5L) and cleans up to 5,000 square feet (465 m²).
- Snug-fitting lid minimizes exposure to chemicals.
- Lightweight mop system weighs only 7 lbs. (3.2 kg) with full tank.
- Trigger flow control mechanism releases cleaning solution on demand or continuously.
- Angled mop head cleans hard-to-reach areas and is available in two styles: smooth surface for standard floor cleaning, and textured surface for more abrasive action.
- Mop head is available Validated Sterile. Gamma irradiated to 10⁻⁶ Sterility Assurance Level, one of the strictest guidelines established by the AAMI/ISO.

QuickTask™ Mops

The QuickTask product line consists of a variety of knitted polyester and microfiber mop covers that easily slip onto a hinged mop head frame and handle assembly. QuickTask mop head frames are available in stainless steel or durable autoclavable plastic. Mop head covers and frames are compatible with a wide range of disinfectants, chemicals and solutions. Contec offers compatible buckets and carts in autoclavable polypropylene and stainless steel; see page 15 for details.

QuickTask Mop Covers:

TASK0200 and TASK0250 *(Sterile) 89201-654 and 89198-856*
The lightest mop cover in the range, the sorbent cleanroom laundered multi-layer knitted polyester is ideal for use on smooth surfaces. Disposable.

• Sorbent knit structure applies solutions evenly while removing contaminants.

• TASK0250 is sterilized by gamma irradiation.
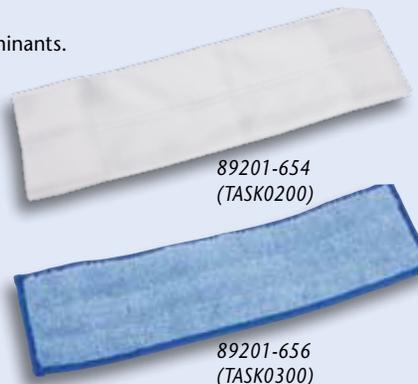

TASK0300 *89201-656*
The most sorbent mop cover in the range, the blue small loop microfiber construction of 89201-656 provides exceptional performance in removing liquids, soil, residues and other contaminants from most surfaces. Can be laundered and autoclaved.

• Microfiber construction for exceptional sorbency and mop-to-dry performance on wet surfaces.

• Compatible with chlorine solutions.

• Effectively cleans polymeric flooring.

89201-654
(TASK0200)

89201-656
(TASK0300)

TASK0400 *89198-858*
The cleanest and most durable mop cover in the range, 89198-858 has tubular knit loops that conform to almost any shape, making cleaning of cove bases and ceiling and wall joints easier than with standard flat mops. Cleanroom laundered. Can be repeatedly laundered and autoclaved providing exceptional value.

• Microfiber construction for exceptional sorbency and mop-to-dry performance on wet surfaces.

• Compatible with a wide range of chemicals and disinfectants, including chlorine solutions.

QuickTask™ Hardware

Stainless steel and polypropylene mop head frames and handles for QuickTask mops

Durable and light-weight folding mop head frames are available in blue polypropylene or lightweight stainless steel. Autoclavable; compatible with most common disinfectant solutions and solvents.

*Blue polypropylene mop head frame **89201-650** (2740) attaches easily to stainless steel handle **89201-652** (2725E).*

*Stainless steel mop head 89198-838 (**2749**) has been designed for use exclusively with all Contec QuickConnect handles.*

Tax-Fre® Mopping System
Technical tack cloth dry mop

Designed for dry mopping floors and walls, Contec's Tax-Fre mop uses disposable mop covers with a unique non-transfering low-tack adhesive to capture small particles and other debris, leaving surfaces extremely clean without the use of solvents or other liquids. Mop covers feature a soft texture that will not scratch or harm sensitive surfaces. The large trapezoid-shaped mop head swivels on a lightweight 8' (2.4m) telescoping aluminum handle, allowing operators to clean hard-to-reach areas. All Tax-Fre hardware is cleanroom compatible, but not autoclavable.
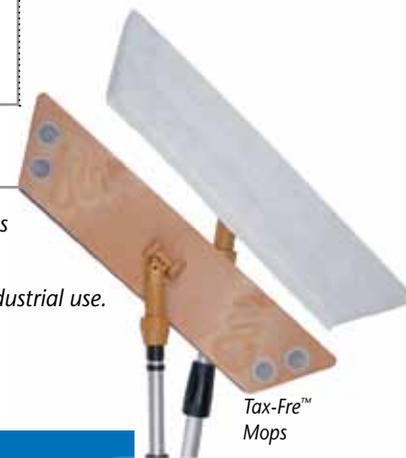

APPLICATIONS

• *Use to capture small particles and fibers, such as powder, dander, dust, lint, and hair.*

• *Ideal for cleanroom, laboratory, clinical, and industrial use.*

• *Tax-Fre is designed for DRY use, not to be used with liquids of any kind.*

EasyCurve™ Mop
The convenience of a self-wringing mop without the ergonomic pain

Contec's EasyCurve mop is designed to provide a single convenient system which can be used on floors, walls, and ceilings. The mop, bucket, and cart system are a compact design which maneuvers easily into most any cleanroom and can be stored in a minimal space. Contec's EasyCurve mophead consists of an outer fabric-lamination to reduce particulation and insure uniform distribution of disinfectants and cleaners. The mop head is attached to a curved, stainless steel frame using a patented latch tab system that is simple and easy to use. The curved head design offers a true "lift and pull" surface cleaning action. The full pivoting head allows effortless surface contact and outstanding maneuverability – making EasyCurve an ideal cleaning tool for ceilings, walls and floors.

Historically, self-wringing mops have been a preferred multi-surface tool, however this convenience comes at a major ergonomic cost to operators who are repeatedly lifting the heavy wringing system with each stroke of the mop. The EasyCurve mop is designed to offer all the convenience of self-wringing systems without the ergonomic stress and strain on operators arms, shoulders, and back.

EasyCurve mop heads are available in non-sterile and validated sterile versions. All hardware and mop heads are autoclavable.

The EasyCurve mop head frame attaches to a 60" (152.4cm) fixed-length stainless steel handle. For added convenience and flexibility, EasyCurve can be used with our QuickConnect autoclavable aluminum and stainless steel telescoping handles.

FEATURES & BENEFITS

- Durable polyester fabric outer layer minimizes particle generation.
- Designed to minimize operator strain.
- Compact system designed for all size cleanrooms.
- EasyCurve mopheads are available validated sterile.

APPLICATIONS

- *Designed for use in pharmaceutical and medical device manufacturing plants, hospitals, compounding pharmacies, and other similar critical or controlled environments.*
- *An outstanding all-surface mop for use on floors, walls, and ceilings.*
- *An ideal upgrade alternative in applications where sponge roller mops are currently used.*

ORDERING INFORMATION

VWR Cat. No.	Contec Part No.	Description
89073-988	EZMP0100	EasyCurve disposable mop head, 14" x 4.25" x 0.75" (35.5 x 10.8 x 1.9cm)
89073-990	EZMP0150	EasyCurve disposable mop head, 14" x 4.25" x 0.75" (35.5 x 10.8 x 1.9cm), sterile
89073-976	2724	EasyCurve pivoting mop head frame, stainless steel

89201-146	2743	Twin divided bucket w/slinger, 5.3 gal (20L)

The Slinger™

The EasyCurve mop uses a separate polyester mesh "sling" style wringer that installs over a 6.5 gallon (25L) polypropylene bucket to completely and easily remove liquid from the mop head. Since the wringer is not on the handle like traditional sponge roller mops, the weight at the end of the handle is reduced by up to 50% in actual use. Both the Slinger™ and bucket are autoclavable.

Bucket 89201-146 (2743) includes Slinger and Stainless Steel frame

QuickConnect™ Mop Hardware
Interchangeable Handles and Frames for Contec Mopping Systems

QuickConnect mop head frames and handles offer maximum flexibility for cleaning in critical environments. Invest in one handle and the various interchangeable heads required for your specific applications. Telescoping and fixed-length handles are available in lightweight anodized aluminum, fiberglass or durable electro-polished stainless steel. Mop head frames have a quick-connect button that allows for easy attachment to all sizes and styles of Contec QuickConnect handles. All components are fully autoclavable.

Contec offers several disinfectant solutions to complement our mopping and wall washing systems. Your regional Contec Sales Representative can recommend the best solution for your cleaning needs.

Accel TB® Disinfectant
Ready-to-use disinfectant solution & wipes

Accel TB is an EPA registered intermediate level disinfectant that is safe and fast acting with a broad spectrum kill. It is based on Accelerated Hydrogen Peroxide technology (AHP), a synergistic blend of commonly used, safe ingredients that, when combined with low levels of hydrogen peroxide, dramatically increase its germicidal potency and cleaning performance.

Compatible with an extensive list of common materials, including 316 & 304 stainless steel, natural & silicone rubber, and most plastics. Ideal for use on environmental surfaces in pharmaceutical cleanrooms, compounding pharmacies, labs and other GMP facilities.

• *Solution is available in 32 ounce, 1 gallon and 5 gallon containers*

• *Now available in convenient presaturated wipes, 160 wipes/canister*

Accel® Concentrate
Surface Cleaner and Disinfectant

Accel Concentrate is a powerful intermediate disinfectant in a concentrated format that requires dilution based on the intended use. Designed for use in all areas that require environmental cleaning and surface disinfection. Utilizing the same Accelerated Hydrogen Peroxide® (AHP®) technology found in Accel TB Ready-to-use solution and wipes, Accel is effective against a broad-spectrum of pathogens in only 5 minutes!

• *Bactericidal, virucidal, fungicidal*

• *Cost-effective concentrated formula*

• *Broad spectrum kill claims*

• *Non-hazardous; no special shipping or storage requirements*
